MOBILE ON-SITE DOCUMENT DESTRUCTION

profitable
easily managed
high recurring demand

Worldwide the increasing requirement to protect confidential information, the continued high use of office paper, combined with greater awareness of the need to recycle has fuelled explosive growth in the document destruction industry.

AXO have assisted entrepreneurs in North America, Australia, Europe and around the globe to enter the mobile document shredding industry, providing equipment, operations advice and marketing collateral.

In the US alone corporations lose an estimated US\$24 billion each year to information theft, with billions also lost in the UK and Europe. According to the National Association for Information Destruction (NAID), document destruction is a US\$1.2 billion industry in the United States.

On-site mobile document destruction has emerged as the most secure and efficient method of destroying confidential documents. According to NAID, 50% of the businesses offering mobile document destruction are start-up companies. There is an increasing need for more entrepreneurs to meet this surging industry demand.

On a daily basis almost all Businesses, Government Departments, Financial Services, Technological Industries and Health Care Providers and many others who are handling private information, have a legal or moral obligation to protect this information and dispose of it responsibly when no longer needed. The most accepted, cost effective, environmentally friendly and certain way of disposing of this information is by on-site mobile secure shredding.

An on-site security shredding business is perfect for start-up operations or as a compliment to an existing business. It requires few staff and has low overheads. This industry is stable, sales-driven and has proven growth potential.

Recurring revenue is earned by placing document collection bins, consoles or bags with customers, and shredding the contents on a regular basis. Additional fees are earned from large one-off purge jobs that occur when offices are shifted or old files deleted in bulk. The destroyed paper is a recyclable commodity that creates a third ongoing revenue stream.

AXO supplies trucks not franchises, so there are no franchise fees, royalties, territory restrictions or exit fees.

AXO Mobile Document Shredding Trucks offer superior combination of throughput, payload and reliability. This means greater revenue potential and ultimately greater profit, backed up by AXO service technicians based in strategic worldwide locations and supported by our Network of Service Providers.

AXO has a wealth of industry experience and knowledge in designing solutions to suit varying local requirements. AXO can assist you with start-up information and ideas, including advertising, web site design and business operation plans.

Does the high growth mobile document shredding industry interest you? Take your first step to financial independence by contacting AXO Shredders today.

AXO Metro 408 Mobile UK/Europe

The AXO Metro 7.5 ton Mobile Shredding Truck has been specifically designed for operating in congested Metropolitan areas. The lightweight design reduces operating costs whilst still retaining AXO's proven reliability and shredding system. With a high throughput of 1000 – 1200kg per hour and payload capacity of 2 tons the AXO Metro is perfect for new start up operations.

The AXO Metro is offered as a turn-key package mounted on a Hino 300 Series 816 7.5 ton GVW Cab/Chassis.

AXO 408 Mobile UK/Europe

The AXO 408 is an excellent around-city vehicle. Its compact size makes it easily manoeuvrable around tight streets or dock ways, but it also has the ability to achieve a payload ratio to GVW which is the best in the industry.

The AXO 408 is offered as a turn-key package mounted on a DAF LF45 12 ton GVW Cab/Chassis.

AXO 608 Mobile UK/Europe

The AXO 608 Mobile has an impressive throughput rate of 2,500kg per hour. Combined with a payload capacity of 5,500kg this makes the AXO 608 Mobile an extremely profitable option for operators who are processing large volumes of paper.

The AXO 608 is offered as a turn key package on the Iveco Euro-cargo 18 ton GVW Cab/Chassis.

AXO 608 K-Lift Mobile UK/Europe

For the Operator who prefers a Kerb-Loading System AXO offer the AXO 608 K-Lift model. The AXO 608 K-Lift features the industries most efficient tipping system that allows an extremely high number of bins to be processed per day.

The AXO K-lift is offered as a turn key package mounted on the Iveco Eurocargo 18 ton GVW Cab/Chassis.
